## Program Overview

Cardiac CT Angiography (CCTA) is a non-invasive test that uses a CT scanner to see the blood flow in the arterial vessels throughout the chest. It enables the physician to look for blocked arteries in the heart using these images. Our goal is to provide advanced technology in cardiac diagnostic imaging as well as premium care for our patients. In order for us to achieve this goal in the most efficient manner, we would like you to review the following **information necessary to schedule** a patient for this procedure.

**To schedule, call our office at 813-870-1747 and Fax order form to 813-343-6089**

### **Please Fax the following information for each patient:**

- o **Order for testing requested**
- o **Enter diagnosis/indications and/or reason for study**
- o **Demographic Information (Including insurance if using insurance\*)**
- o **Recent Office Visit Note**
- o **Current Medication List**
- o **Current/Most recent vital signs/BUN and Creatinine Results**

\*There is a CASH PAY option available for \$400.00. If this is the option the patient chooses, please indicate CASH PAY on the paperwork faxed over.

**Intravenous contrast is used during this procedure. It is CRITICAL to know if the patient has any allergies to contrast.** If the patient has known renal impairment or is at risk for renal impairment, a serum creatinine should be drawn no more than two weeks prior to the procedure.

It is also important to note that if the patient is on any oral diabetic agents that contain Metformin, it will need to be held the day of the procedure and for two days after the procedure. The patient's physician will be responsible for monitoring any diabetic related issues.

**For this test to be performed, the patient's heart rate should optimally be below 60 beats per minute and regular.**

<p><u>Pre-Medication Instructions for Heartrate:</u></p> <ul style="list-style-type: none"><li>○ &gt;75: Corlanor 7.5mg (x2) and Toprolol XL 75mg (x1)</li><li>○ 66-75: Corlanor 7.5mg (x2) and Toprolol XL 50mg (x1)</li><li>○ 50-65: Corlanor 7.5 mg (x2) and Toprolol XL 25mg (x1)</li><li>○ &lt;50: No Meds Needed</li></ul> <p>Take Medications 3-4 hours prior to CCTA</p>	<p><u>Iodine Allergy Instructions:</u></p> <ul style="list-style-type: none"><li>○ Prednisone 50mg: take 1 tablet 13 hours prior, 1 tablet 7 hours prior and 1 tablet 1 hour prior to contrast medica injection</li><li>○ Benadryl 50mg: take 1 hour prior to contrast media injection</li></ul>
